column headings, and above column spanners. Do not use vertical borders or borders around every cell in the table.

All tables include four basic components: number, title, column headings, and body. Write the table number above the table title and body and in bold. Write the table title one double-spaced line below the table number and in italic title case. Label all columns. Center column headings, and capitalize them in sentence case. Include notes beneath the table if needed to describe the contents. Start each type of note (general, specific, and probability) on its own line, and double-space it.

See [sample tables](#) on the APA Style website.

Figures (Sections 7.22–7.32): Use a program appropriate for creating figures (e.g., Word, Excel, Photoshop, Inkscape, SPSS). Number figures in the order they are mentioned in the text. Within figures, check that images are clear,

When citing multiple works in parentheses, place the citations in alphabetical order. When multiple parenthetical citations have the same author(s), order the years chronologically and separate them with commas (e.g., Coutlee, 2019, 2020). When the authors are different, separate the parenthetical citations with semicolons (e.g., Coutlee, 2019, 2020; Ngwane, 2020; Oishi, 2019).

For more examples, see the [Citation of Multiple Works](#) page.

Limit the use of direct quotations. Include the author (or title if no author), year, and specific part of the work (page number(s), paragraph number(s), section name) in the citation.

- **Short quotation (less than 40 words):** Use double quotation marks around the quotation.
- **Block quotation (40 words or more):** Use the block format: Indent the entire quotation 0.5 in. from the left margin and double-space it.

For more information, see the [Quotations](#) page.

References (Chapters 9 and 10)

Start the reference list on a new page after the text.

Center and bold the section label “References” at the top of the page.

Double-space the entire reference list, both within and between entries.

Use a hanging indent for each reference entry: First line of the reference is flush left, and subsequent lines are indented by 0.5 in. Apply the hanging indent using the paragraph-formatting function of your word-processing program.

All reference entries should have a corresponding in-text citation. The beginning of the reference entry (usually the first author’s surname) and year should match the corresponding in-text citation.

List references in alphabetical order according to seventh edition guidelines.

Create the appropriate reference entry for the type of work being cited, as described in Chapter 9 and shown in Chapter 10 and on the [Reference Examples](#) pages.

Do not create reference entries for [personal communications](#) and [secondary sources](#).

For a list of works to include and exclude from a reference list, see the [Works Included](#) page.

Each reference entry includes four elements: [author](#), [date](#), [title](#), and [source](#).

See exceptions for references with missing information on the [Missing Information](#) page.

Use punctuation to group information and separate reference elements.
